## EXPERIENCE

### Technology Support Specialist

University of Minnesota Office of Information Technology

Minneapolis, MN  
February 2024 – Present

- Collaborated with specialized teams to troubleshoot a variety of technology-related issues over the phone for University of Minnesota customers, ensuring efficient problem resolution
- Utilized diverse technologies such as TeamDynamix, NTS Service Gateway, Citrix Workspace, BeyondTrust, Mitel Communicator, Whentowork, Slack, and Zoom. Proficiently resolved technology issues, enhancing customer satisfaction

### Co-Founder

GenXCapital

Birmingham, United Kingdom  
December 2023 – Present

- Co-founded GenXCapital, a hedge fund specializing in providing accessible portfolio diversification solutions to individual clients and local/international businesses
- Spearheaded the development of proprietary software tailored for investment purposes, contributing to the company's competitive edge in equity research, FX trading, asset management, and risk assessment

### Co-Founder & Leader

Korean Computer Science Student Organization

Minneapolis, MN  
September 2023 – Present

- Orchestrated a team in organizing impactful events fostering a collaborative learning environment within the Korean computer science community, resulting in increased engagement and knowledge sharing
- Accelerated and curated a comprehensive database of resources, amplifying access to academic tutorials, internships, and career opportunities

### Information Technology Specialist

Republic of Korea Marine Corps

Incheon, Republic of Korea  
August 2022 – July 2023

- Administered technical support requests, proactively diagnosing and rectifying system and technical issues, ensuring uninterrupted operational continuity
- Initiated supplier-conducted technical inspections, leading to timely repairs and minimized downtime, maintaining optimal operational efficiency

### Military Intelligence Management System Engineer

Republic of Korea Marine Corps

Incheon, Republic of Korea  
January 2022 – August 2022

- Accomplished a key role in collaborating with a cross-functional team to develop and implement innovative solutions, resulting in a significant reduction in system downtime and notable enhancement in operational efficiency
- Contributed to the improvement of system reliability and efficiency, fostering a more robust and secure military intelligence framework

## PROJECTS

### Weather-Based Outfit Suggestion App (Personal Project)

February 2024 – Present

- Initiated a weather-based outfit suggestion app leveraging user-centric customization, utilizing skills in software development
- Expanded daily outfit suggestion feature for personalized user experience through algorithm development and data analysis

### Personal Website (Personal Project)

January 2024 – February 2024

- Architected a personal website featuring intro, about me, experience, projects, resume, and contact information
- Crafted a user-friendly interface and attractive design through seamless integration of HTML, CSS, and Python

### Spotify Playlist Generator (Personal Project)

November 2023 – Present

- Implemented Python Spotify Playlist Generator, using Spotify API for personalized playlists with up to 10 artists
- Orchestrated seamless web app integration, highlighting expertise in API interaction and continuous development

### WhereTo (Personal Project)

August 2023 – September 2023

- Implemented a web service for visa sponsorship information, improving accessibility for international students
- Utilized HTML, CSS, and Python to enhance user experience and functionality, ensuring optimized performance across platforms
